Power injection Gun - Dry System

The Power Injection Gun is a suction blast system optimized to provide a next to pressure blasting performance. Low weight and good handling makes the injection gun a perfect unit for small and fast changing on-site jobs. Highest mobility, easy operation and a low cost make this unit very often the preferred choice over a pressure blast system.

Area of application	base surface preparation removing of paint, rust, dirt and scale roughening subsequent blasting of mounted parts
Abrasive media	suitable for every common media
Maximum grain size	1,5 mm
Blasting pressure	0 < > 12 bar
Operating temperature	0°C < > 50°C
