

## EGYPT PEARLS Abrasive for Blasting Application

EGYPT PEARLS Abrasive quartz is manufactured from natural occurring and chemically inert hard rock, the high level of hardness and toughness make the EGYPT PEARLS abrasive ideal material for metallic surface blasting application. The natural material is subjected to crushing and sieving process to achieve the specific grain size for blasting operation, the product is free from any detrimental matter affecting in bonding of coatings with metallic surfaces.

EGYPT PEARLS is available and generally low cost comparing with the other abrasive Media. The abrasive sizes are available as per customer requirements on regular basis.

- يتم تصنيع الكوارتز من صخور صلبة وطبيعية وهي على مستوى عالي من الصلابة والمتانة مما يجعل عمليات الترميل مثالية وبالمواصفات العالية
- وتخضع مادة الكوارتز لعملية التكسير والغرلة لتحقيق حجم الحبيبات المحدد لعملية الترميل وهو منتج خالي من اي مواد ضارة او قد تؤثر على عملية الطلاء على الاسطح المعدنية
- ومتوفر بكميات كبيرة وبتكلفة منخفضة كما هو متوفر بالمقاسات وفقا ومتطلبات العملاء
