

LeaDers

For Supplies & Trading

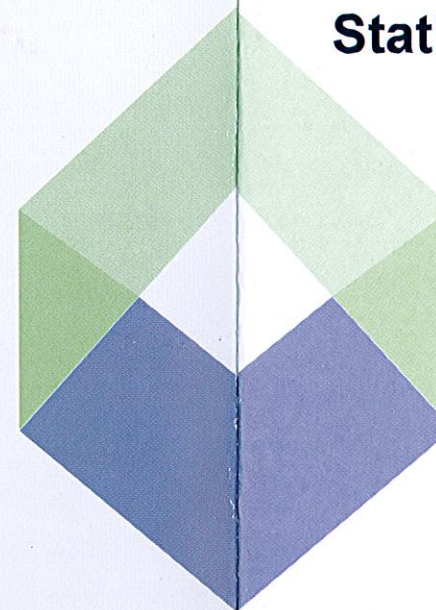

Dear Partners,

LEADERS is established for facilitate the surface preparation field by supplying the most required equipments and provide technical assistant our job is the satisfaction of our customers. for us, they are not just clients, they are partners and their successis our success. we care that our products are safe for the environment and match the higher standerds. safety plus sufficient are our job. our main target is touching the future with our partners by providing thelatest in the surface preparation field

sincerely...

Industrial Systems -

Controlled environments for premium blasting

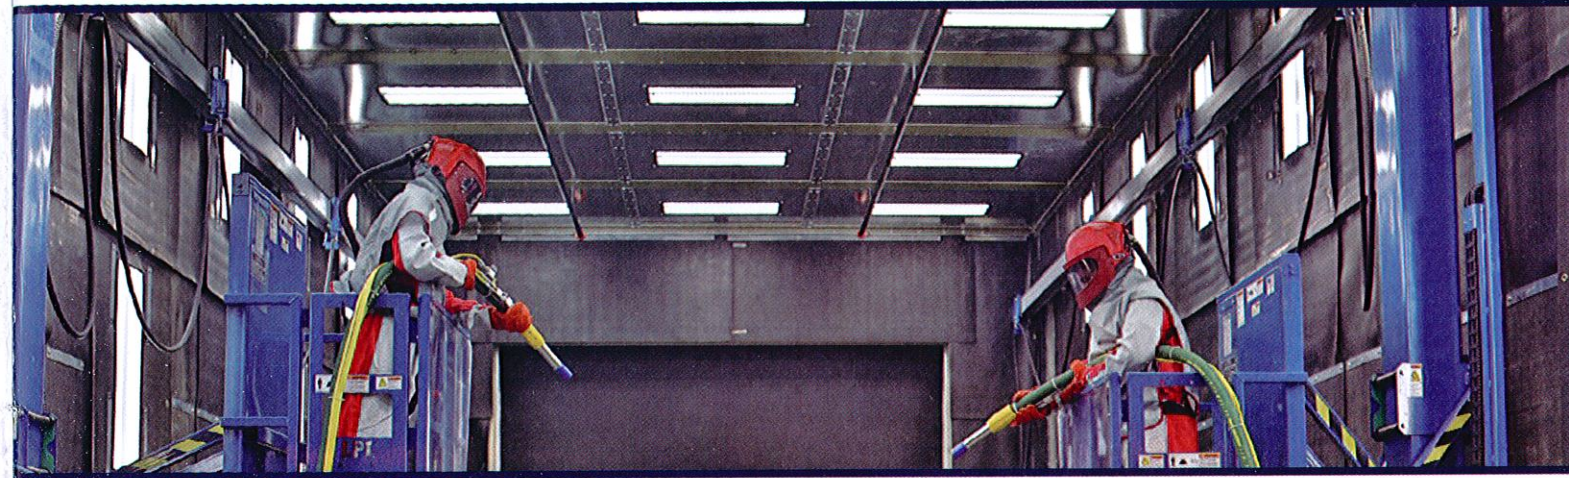

Custom - designed blast facilities are the ptimal soultion for large workpieces. Clemco staff methodically works with each and every customer to determine their exact requirements. Using this dara, Clemco engineers design a system tailored to every specific of the job, taking into account each consideration of safety, efficiency and performance. Clemco quality blast facilities set the industry standard worldwide, and every reflects this commitment.

touch the future ...

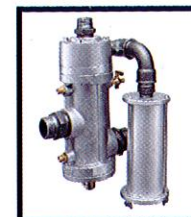

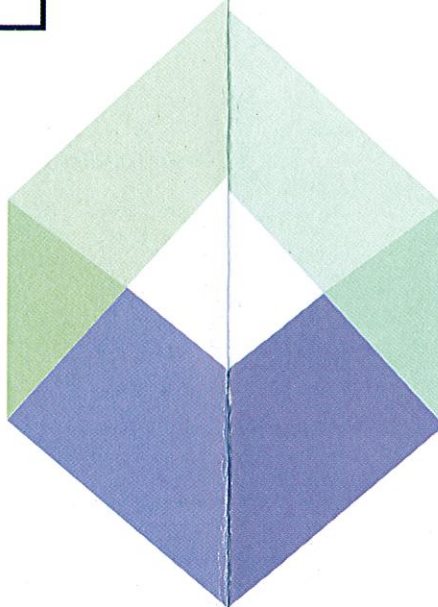

FROM BLAST POT TO NOZZLE – WE HAVE EVERYTHING YOU NEED FOR OPTIMAL RESULTS

The blast machine is the heart of the pressure blasting system. Attention to the proper configuration and compatibility of the machine's components is crucial and ensures maximum blasting efficiency. Thanks to Clemco's wealth of experience and commitment to innovation, Clemco products deliver high levels of reliability, longevity, and safety in abrasive blasting.

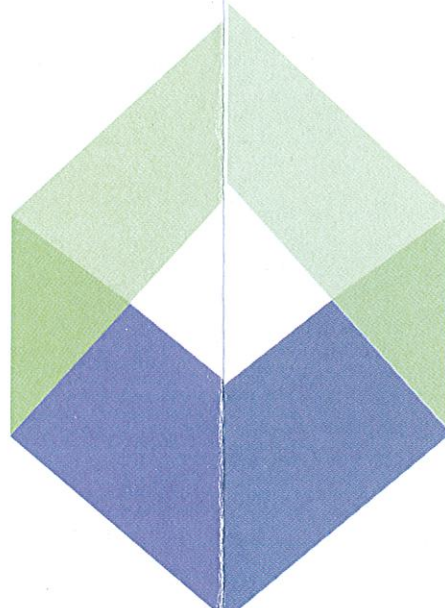

BLAST NOZZLES – PEAK PERFORMANCE AND MAXIMUM DURABILITY
«A WIDE RANGE OF NOZZLE LINERS AND JACKETS TO SUIT EVERY APPLICATION AND ENVIRONMENT»

Airless machines

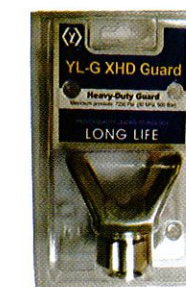

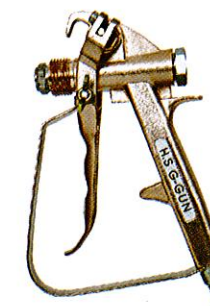

HASCO Airless Machines HASCO paint sprayer can make quick work of even the biggest painting jobs. They are portable and can be easy to tilt the paint over the quart or to pull paint directly from the container. Airless paint sprayers can handle any type of paint like primer, stain, varnish etc. Even thick paint can be handled by the airless sprayers which usually cannot be handled with other type of sprayers. Airless sprayers come with a pump, hose, tip and gun.

HASCO Airless Sprayer comes with a pump, hose, tip and gun. The narrow end of the hose is connected to the nozzle and the wider end will go into the paint. The gun allows the painter to control the flow of the paint. If you press the trigger, the valve of the sprayer opens and allows the paint to flow through the tip. There are various sizes of sprayer tips available in the market. The size of the tips determines the amount of paint flow through the nozzle.

ACCESSORIES

Lianyungang Jinhong Mining Co., Ltd. is located in Donghai County, Lianyungang City, Jiangsu, China. We are an large-scale Rock mineral manufacturer, integrating garnet mining, separation, sales and scientific research, participated by a well known state-owned enterprise. Our main products are rutile, garnet and omphacite.

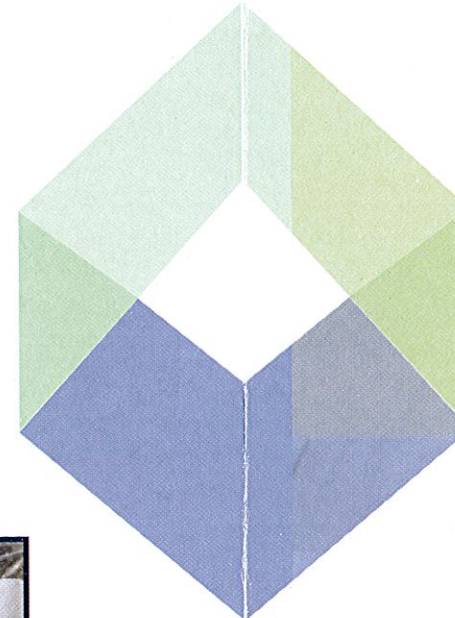

Garnet mesh 30/60

Garnet mesh 80

Green Garnet mesh 30/60

Clemgrit

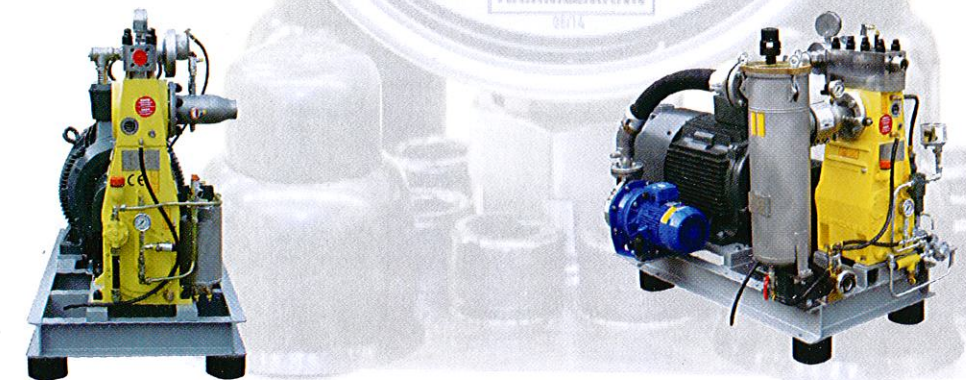

The company founded 1949 in Oelde, Westphalia by Paul Hammelmann took the decision to start manufacturing high pressure pumps and systems during 1955 laying the foundations of the current business. Hammelmann was a pioneer in the industry that was then known as Hydrodynamics and was responsible for many important breakthroughs. .

Up to now over 300 patents have been granted both at home and abroad which are a sign of the continuous, innovative development that has been part of our policy for decades

Electrically driven

The high pressure pump units are built to be reliable and user friendly. The diesel engine is directly connected to the high pressure pump by a highly flexible coupling*. This assembly is mounted on a torsion free sub frame. The electric drive motors are selected to meet the individual power and performance parameters

Maximum motor speed: 1800 r.p.m.
* HDP 20 and HDP 40 with belt drive

Diesel driven

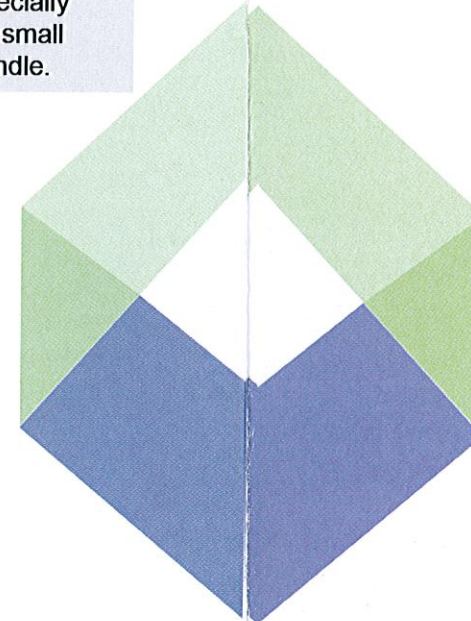

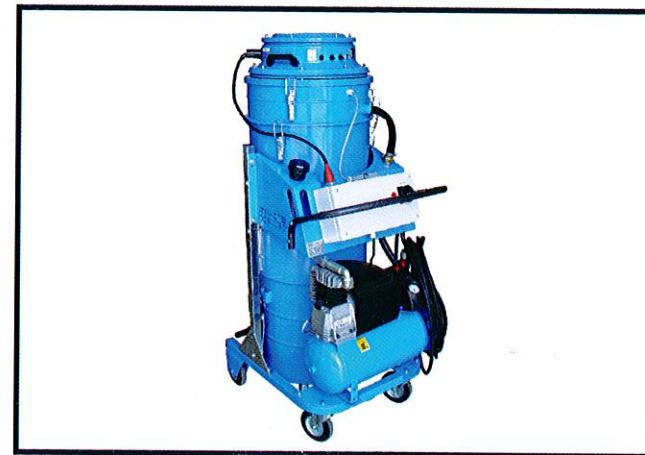

The high pressure pump units are built to be reliable and user friendly. The diesel engine, from a manufacturer with a world wide service network, is directly connected to the high pressure pump by a highly flexible coupling. This assembly is mounted on a torsion free sub frame with anti vibration mountings as are all ancillary components such as boost pump, batteries and header tank

The modernization of mobile blast machines according to the newest technical standard is one of our specialties. With regards to Grinding, Polishing and Scarifying machines we are cooperating with Worldwide leading companies. High quality, innovative diamond tools for IMPACTS machines and for other machines are permanently in stock. In 2004, the company IMPACTS was founded by a team of specialists with together more than 100 years of experience in the mobile surface preparation industry

IMPACTS S210E-40R

The STREAMER S210E40R from IMPACTS is a very powerful, but compact and light weight mobile blast machine. The combination of the powerful wheel motor with an optimized separation system and the variable speed drive motor makes the machine very efficient. The machine has been specially developed to achieve a high blasting performance on small and medium areas. The machine is very easy to handle.

IMPACTS S320E

The blast machine IMPACTS STREAMER S320E is a compact and powerful blast machine to work on medium sized horizontal surfaces. In order to reach the optimal blasting capacity and performance, it is recommended to use the STREAMER S320E together with the IMPACTS dust collector DUSTCOM DC3324.

IMPACTS S410E

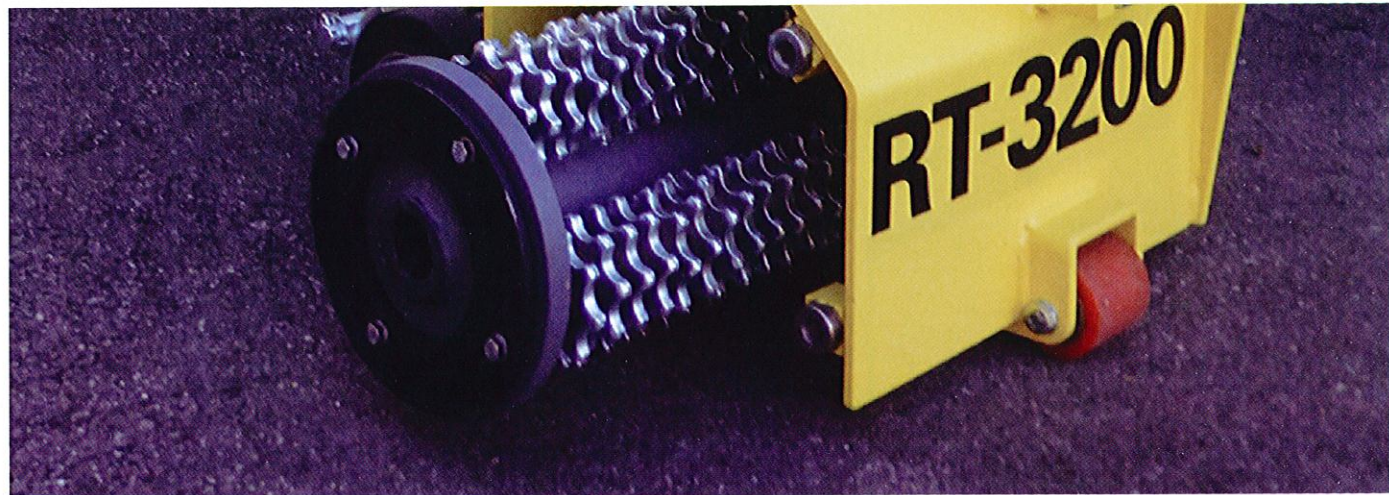

The blast machine STREAMER S410E from IMPACTS is a very compact and powerful machine to work on medium to bigger horizontal surfaces. In order to reach the optimal blasting capacity, it is recommended to use the STREAMER S410E together with the IMPACTS dust collector DUSTCOM DC 4025.

IMPACTS S750E

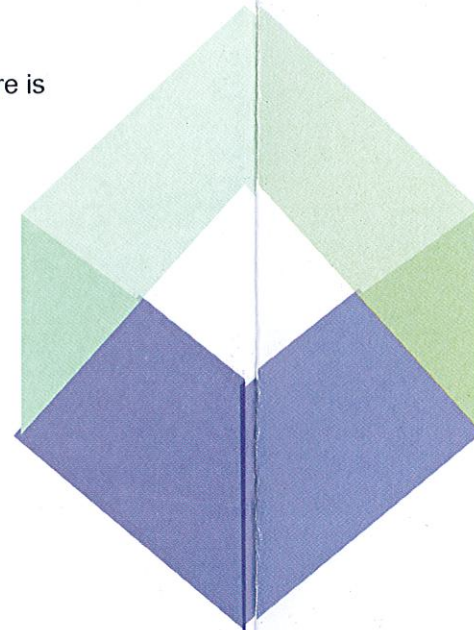

The blast machine STREAMER S750E from IMPACTS is a very compact and powerful machine to work on medium to bigger horizontal surfaces. In order to reach the optimal blasting capacity, it is recommended to use the STREAMERS S750E together with the IMPACTS dust collector DUSTCOM DC5020.

AIRTEC - Your surface specialist!

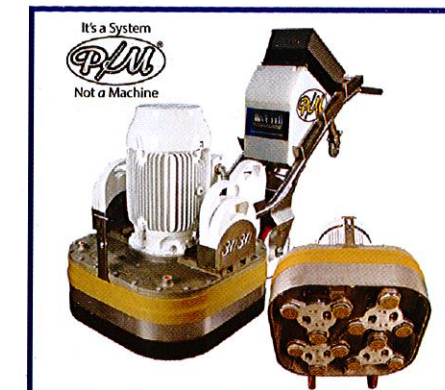

Milling, scarifying, roughening, grinding, removing, blasting, etc....all of this and much more is a part of the AIRTEC program

CLC Diamond System Polish

STI GRINDING AND POLISHING MACHINES

Substrate Technology is the leading provider of world class machinery and diamond tooling. STI encourage you to check out the full range of concrete surface preparation such as concrete polishing, marble restoration, & terrazzo restoration products and more we offer.
